

Lab-01 (Arrays)

1. Dynamic Array methods

method	Syntax
Allocate	arr = new [10];
Resize	arr = new [20](arr);
Delete	arr.delete();
Size	arr.size();

2. Queue methods

method	Syntax
push Back	q.push-back(data);
push front	q.push-front(data);
pop back	variable = q.pop-back();
pop front	variable = q.pop-front();
Insert	q.insert(location, data);
Delete	q.delete(index);
Delete all	q.delete();
Size	q.size();

3. Associative Array methods

method	Syntax
first	ass.first(idn);
last	ass.last(idn);
next	ass.next(idn);
Previous	ass.prev(idn);
Exists	ass.exists(idn);
delete index	ass.delete(idn);
delete all	ass.delete();
Number of Entries	ass.name();

4. Reduction methods

method	Syntax
Sum	arr.sum();
Product	arr.product();
AND	arr.and();
OR	arr.or();
XOR	arr.xor();

with condition $\rightarrow$ arr.sum() with
condition

5. Sorting methods

method	Syntax
sort	arr.sort();
Reverse sort	arr.reverse();
Reverse	arr.reverse();
Shuffle	arr.shuffle();

6. Locator methods

method	Syntax
min	arr.min();
max	arr.max();
unique	arr.unique();
Find	arr.find();
Find first	arr.find-first();
Find last	arr.find-last();
Find first index	arr.find-first-index();
Find last index	arr.find-last-index();
